

Ronny's Eleven Heaven

My old mate Horst Blim sent me these great photos of this superb FJ1100. It belongs to Ronny (sorry Horst didn't forward a surname!) As we have grown to expect from a German FJ, the quality looks top notch.

The bike features Ohlins rear suspension. Dura-pipe stainless silencers. Lucas discs and braided brake lines. XJR front and rear wheels. FZR400RR four-pots calipers (thanks to Piolo Martin in Chile). There's an exquisite seat, made by Ronny himself and LED rear light.

Don't forget that Horst can supply a number of fitting kits for various wheel conversions (including ABS rear). Check out www.hbbike.de
